## Prendio's Tyler Mizenko to Attend The 41st Annual J.P. Morgan Health Care Conference, Jan 9-12 in San Francisco

The 41st Annual J.P. Morgan [Health Care Conference](#) will take place on January 9-12, 2023 in San Francisco, California, and Prendio's Vice President of Relationships and Business Development Tyler Mizenko will be in attendance. This premier conference is the largest and most informative health care investment symposium in the industry, connecting global industry leaders, emerging fast-growth companies, innovative technology creators and members of the investment community. Attendance is by invitation only. Please reach out to your J.P. Morgan representative to inquire about an invitation, or [click here](#) to schedule a time to meet with Tyler January 9 – 12 in the Bay Area.

## It's Official--Prendio is Built for NetSuite!

Have you heard the news? Prendio has partnered with NetSuite, the #1 Cloud ERP, to create the most efficient procure-to-pay system in the history of biotech. Check out our [SuiteApp listing](#) or read up on what makes our joint solution so exceptional by downloading our informative white paper, [Five Problems Finance Professionals Experience and How Prendio for NetSuite Can Help](#).

## Featured Feature: The A/P Push aka Let's Align

Ask any finance department Prendio user what their favorite feature is, and they'll likely have a lot to say about the A/P Push aka Let's Align feature. The overarching goal of this feature is to make life easier for finance departments of life science organizations everywhere, and we accomplish this by:

- Putting control back into the hands of the finance department with the ability to edit G/Ls, Departments, and Project Codes before pushing for payment
- Automatically creating a .pdf bundle containing digital copies of every order's PO/Invoice/Packing Slip/Approval History that is sent to your ERP and also available to download historically at any time
- Pushing and creating bills in your ERP, checking for duplicate invoices and allowing you to inspect and update the CoA/segment coding
- Pushing/creating any new suppliers in your ERP and allowing you to automatically align mapping between Prendio and ERP data
- Checking for invoices that have been paid and automatically updating their status, including payment info

With the features you need to be organized and audit-ready at all times, it's no wonder finance departments love Prendio!
